

PRODIGY®

iQ pump™

*Personalized Insulin Delivery System*

## Features

The Prodigy IQ Pump™ is a portable device designed to deliver insulin without shots or tubing based on your personalized settings. The Prodigy IQ Pump™ consists of two pieces, a disposable patch-pump unit and a handheld meter control device. The handheld device has an attractive cell phone-like design for discrete bolus delivery and comes with a full-color LCD touch screen that can be deactivated for the visually impaired users. The pump has a built-in, 200 – 400-unit insulin reservoir, automated cannula inserter, pumping mechanism and power supply.

- Designed for the visually impaired with full audible voice feedback and buttons
- Smallest basal increment available, 0.009 units, making it safe enough for children
- Tube or tubeless connection with wireless technology
- Pain-free automatic cannula insertion
- Built-in blood glucose meter—No Coding required

## Personal Diabetes Management

The Prodigy IQ Pump™ allows you to manage your diabetes with a personalized insulin delivery system, freeing you from multiple daily injections and giving you the ability to quickly and easily adjust insulin levels when necessary. The handheld device stores and summarizes insulin deliveries, blood glucose and carbohydrate levels. Equipped with a built-in blood glucose meter, the Prodigy IQ Pump™ eliminates the need to carry a separate meter for blood glucose testing. The disposable pump is a discrete, hands-free unit equipped with automated insertion in order to minimize errors. “One Time Use” guarantees uncontaminated insulin.

The Prodigy® IQ Pump™ is made with quality components and comes with a lifetime warranty.

*Personalized Insulin Delivery System*

### Earphone Jack

Plug in your earphones to privately listen to your results.

### Test Strip Port

The built-in blood glucose meter automatically turns on when a test strip is inserted.

### Handheld Device

Stores and summarizes insulin deliveries, blood glucose, carbohydrate levels and much more.

### LCD Screen

An attractive, cell phone-like design with a full color, backlit touch screen.

### Reusable Electronics

Provides minimal electronic waste and can be reused with each new pump base.

### Mini USB Port

This multipurpose port uses any standard USB cable. Charge your device and/or download test results to your personal computer.

### Insulin Chamber

The pump has a built-in, 200-unit reservoir for insulin. "One Time Use" guarantees uncontaminated insulin.

### Buttons

The three (3) buttons have been designed with the visually impaired in mind and can be used in place of the touch screen.

### Disposable Pump

Completely waterproof and discrete. Hands-free unit equipped with automated insertion to minimize errors.
