GENETICS OF AGE RELATED MACULOPATHY

Dr. Michael Gorin at Jules Stein Eye Institute at UCLA is conducting a nationwide study of genetic and other risk factors that contribute to the development of age-related macular degeneration (also known as age-related maculopathy). You or members of your family may be eligible to participate in this observational study (this is not a treatment trial) which does not require that you come to UCLA, but allows you to participate through a confidential and secure website. If you wish to learn more about this study, you can go to the following website and read about the study with complete anonymity (and even send questions to the research coordinators).
