## Station Improvements

The Jefferson Park Transit Center is an important transit hub in the community, providing access to the Blue Line and 12 bus routes, as well as access to the Metra Union Pacific-Northwest Line.

The \$25 million project includes:

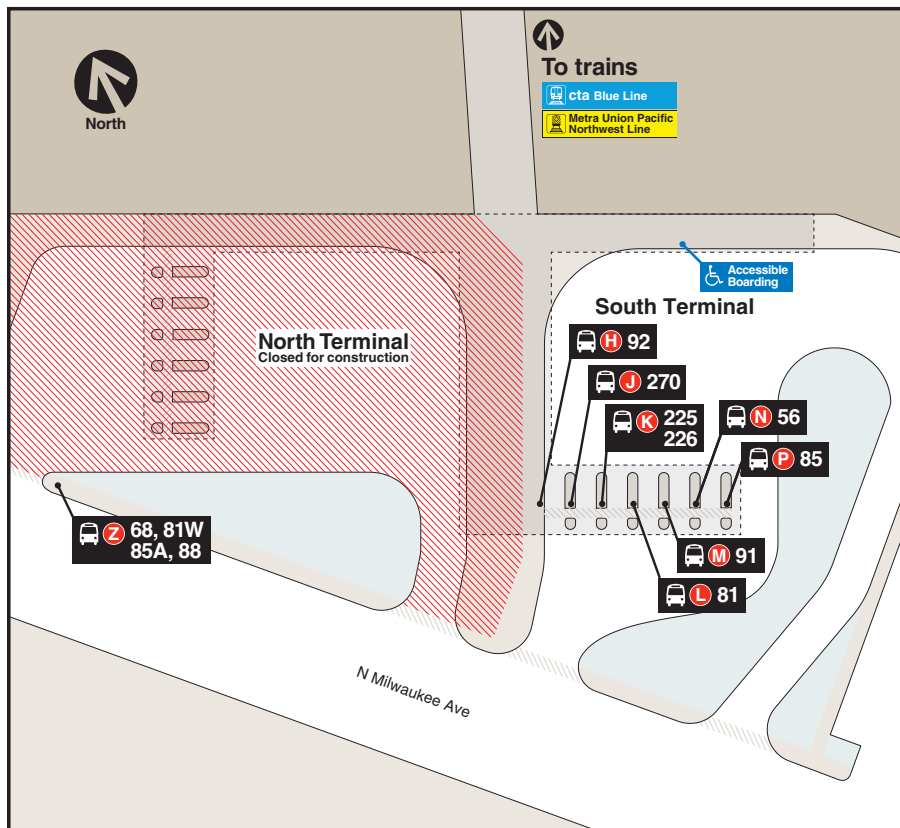

- Replacement of the bus terminal and creating bus boarding areas that are ADA-compliant by widening the loading islands and adding audio assistance.
- Improved boarding for rail users to increase safety and additional cameras to enhance security for customers.
- Modern, updated bus and train canopies, new signage, new LED lighting, newly refinished platform surfaces and new exterior paint to enhance customers' travel experience.
- Architectural and art enhancements that improve the aesthetics of the Terminal and contribute to the identity of the Jefferson Park downtown community. This will include the installation of custom windbreaks at the bus terminal, with design provided by renowned conceptual artist, Jamie Pawlus (Indianapolis, IN). Aspects of the Jefferson Park community inspired the theme of the work.
