

Chicopee Public Library

presents

SEVEN ART MOVEMENTS  
a tactile art show by Tactile Images  
May 11- May 25, 2024

Visit the Chicopee Public Library to experience various works of art including: the Mona Lisa by da Vinci, the Girl with the Pearl Earring by Vermeer, the Scream by Munch and others from various periods in art.

Tactile Images is committed to providing tactile experiences for the blind and disabled. Images designed for touch provide the opportunity to acquire visual information independently, without relying on recorded descriptions or the interpretation of a sighted companion. Tactile printing is an innovative process patented by 3DPhotoWorks, the parent company of Tactile Images, which converts any image into a three-dimensional tactile print that blind and disabled individuals assemble in their mind's eye through touch, sound, and smell. Customized audio narratives, as well as components that emit unique smells, enhance the experience. Tactile Images' partnership with Getty Images and the National Federation of the Blind reinforces its mission to deliver tactile images to every museum, science center, library, and government agency worldwide.

We are thrilled to host this exhibit and would love to have you visit us.

If you would like to plan a group visit  
please email Anne Gancarz
