Please make checks payable to The Maryland School for the Blind and send to 3501 Taylor Ave.
Baltimore, MD 21236 Attn: Kerry Michael

As iOS devices (iPads, iPhones, and iPods) and PC's are used more and more to provide reading materials in digital text and braille, Daisy, and audio formats, there are a number of paths (and pitfalls) to preparing and delivering materials in formats that students can use. This presentation explores how to prepare materials, select appropriate applications for preparation and presentation, and for getting materials into students' devices. A variety of apps, programs, and options will be demonstrated.

Breakfast buffet and lunch included.
