

Go with Goddard. Grow @ Goddard.

Goddard Space Flight Center conducts innovative and exciting work in earth science, heliophysics, astrophysics, planetary science, engineering, communications and technology development across four campuses.

ENGINEERING

- Aerospace Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Detector Systems
- Environmental Engineering
- Instrumentation Engineering
- Materials Engineering
- Composites Applications
- Mechanical Engineering
- Microelectronics & Signal Processing
- Optical Engineering
- Robotics
- Thermal Engineering
- Math
- Computer Science
- Physics
- Systems Engineering
- Propulsion Engineering

TECHNOLOGY

- Airborne Science Research
- Balloons & Sounding Rockets
- Computer Science
 - Artificial Intelligence
 - Data / Information Visualization
 - Data Systems Technology
 - Earth & Space Data Computing
 - High Performance Computing & Communications
- Electronics
- Information Technology
- Nanotechnology
- Software Engineering
- Systems Engineering/Design

ADMINISTRATIVE

- Accounting
- Communications
- Education
- Human Capital
- Legal
- Procurement

SCIENCE

- Astrophysics
 - High Energy Astrophysics
 - Astroparticle Physics
 - Gravitational Astrophysics
 - Cosmology
 - Exoplanets and Stellar Astrophysics
- Earth Sciences
 - Climate & Radiation
 - Atmospheric Physics & Chemistry
 - Cryospheric, Hydrospheric and Biospheric Sciences
 - Ocean Ecology
 - Mesoscale Processes
- Heliophysics
 - Solar Physics
 - Geospace Physics
 - Space Weather
- Solar System Exploration
 - Planetary Systems
 - Planetary Geodynamics
 - Astrochemistry
 - Laser Remote Sensing
 - Planetary Environments

MATHEMATICS

- Applied Math
- General Math

• = Discipline choices in OSSI; NIFS
- = Specific areas of research at Goddard
