

Online survey for mothers with a physical or mobility disability

UMass Medical School is conducting an online survey to learn about the health care experiences of mothers with physical or mobility disabilities before, during, and after pregnancy. This survey is part of a research study.

To participate, you must:

- Have a physical or mobility disability
- Have given birth to a baby within the last ten (10) years
- Be able to complete the survey in either English or Spanish

Your participation involves:

- About 20 minutes of your time
- Access to a computer and internet
- Answering questions about your health care experiences during your most recent pregnancy
- Privacy; the survey is anonymous, we will not ask you to provide any contact information

Interested?

Visit the survey website and answer a few brief screening questions to make sure you are eligible.

Privacy

Your participation is completely voluntary. Nothing will happen to any services you receive if you decide not to take part. Your information will be completely anonymous so your name will not be connected with any of your survey answers. Your answers will be combined with other women's answers and shared in our final reports and articles.
