

Explore, Experiment, Excel! Upcoming Event for Blind and Low-Vision Students

Join the NFB of New Jersey for a transformative day of discovery designed for blind youth, June 7, 2025, at the Joseph Kohn Training Center in New Brunswick from 9:00 a.m. to 3:00 p.m. Lunch and snacks will be provided. This year, we're diving into the exciting world of the scientific method! Participate in hands-on, accessible experiments where you'll use observation, prediction, and testing to tackle real-world problems. Exciting experiments exploring physics, technology, chemistry, and engineering await!

This opportunity offers your child:

- Blind role models
- Accessible experiments
- Hands-on nonvisual skills instruction

This program is free to all registered blind and low-vision youth. Learn more and apply at nfb.org/stem2u.

Thanks to a generous donation from General Motors (GM), blind students across the country will gain foundational nonvisual tools and techniques to pursue further education and careers in STEM.

Contact Lizzie Miner at stem2u@nfbnj.org or 908-666-3923 for more information.
