

Explore, Experiment, Excel! Upcoming Event for Blind and Low-Vision Students

Join the NFB of Oregon for a transformative day of discovery designed for blind youth, June 7, 2025 at the Oregon Commission for the Blind in Portland. The program will be held from 10:00 a.m. to 3:00 p.m. Lunch is provided. This year, we're diving into the exciting world of the scientific method! Participate in hands-on, accessible experiments where you'll use observation, prediction, and testing to tackle real-world problems. Exciting experiments exploring physics, technology, chemistry, and engineering await!

This opportunity offers your child:

- Blind role models
- Accessible experiments
- Hands-on nonvisual skills instruction

This program is free to all registered blind and low-vision youth (K-12). Learn more and apply at nfb.org/stem2u.

Thanks to a generous donation from General Motors (GM), blind students across the country will gain foundational nonvisual tools and techniques to pursue further education and careers in STEM.
