Sight Tech Global

December 2-3, 2020 | Virtual Conference

Sight Tech Global is the first global, virtual conference dedicated to fostering discussion among technology pioneers on how rapid advances in AI and related technologies will fundamentally alter the landscape of assistive technology and accessibility.

Format will include one on one interviews, panels, demos with top technologists, researchers, founders, designers and advocates from Apple, Google, Amazon, Verizon Media, Vispero and prominent researchers from leading Universities and much more.

Expert moderators, including TechCrunch editors and prominent figures focused on improving accessibility in the blindness community.
