[Walmart](#) has had some issues lately with a couple of products that they sell at their stores across America.

According to [AllRecipes.com](#), Walmart has announced a recall of 12,000 cartons of their Great Value Family Size Chicken Broth. They say that the packaging could be off on some of them, leading to

spoilage.

The recalled 48-ounce Great Value Family Size Chicken Broth carton packaging has a "best by" date of March 25, 2026, and a UPC code of [007874206684](#).

If you have any of these boxes on your pantry shelves or in your fridge, you are urged to throw them away or bring them back to the purchase location for a complete refund.

The second Walmart recall, according to [AllRecipes.com](#), is from the USDA, and it's kind of weird. Apparently, there are some mislabeled empanadas in the freezer section. Like, very mislabeled.

The empanada packaging is labeled as "Bettergoods Chicken Curry Empanadas," but the product in the packaging may be Bettergoods Apple Cinnamon Empanadas.

According to AllRecipes.com, the mislabeled Bettergoods empanadas were sold only at Walmart stores nationwide. They were produced on Nov. 14, 2024, and packaged on Nov. 20, 2024, and Nov. 21, 2024.

Snacks from the '90s That Have Disappeared

Was there anything better than opening your lunch box and seeing Shark Bites packed in next to some Hi-C Ecto Cooler? A simple pleasure kids of today can't experience.

What other snacks came and went from our lives in the 1990s and beyond? Follow us as we look back at some '90s snacks that have

since disappeared.
