

You're invited to a special OrCam event March 9 – 11, 10 – 4 pm.

Social distancing and & CDC protocols followed.

What Is OrCam?

- Assistive technology for people with reading, print and vision challenges.
- An advanced device that takes a picture of text and reads back the words aloud in real-time. No internet or WiFi needed.
- A wearable or handheld digital reader that captures full pages or selected text. Reads print on paper and text on a screen, identifies faces, products and more.
- A lightweight, portable and discreet personal assistant that talks to you!
- Used by people worldwide to increase independence and get back to what they love doing.

How Does It Work?

It's easy! Point and take a picture! OrCam snaps a photo of what's in front of you, and quickly converts the visual information into audio. OrCam speaks what it sees.

Who Is A Candidate?

Anyone living with impaired vision, reading difficulties, dyslexia, learning challenges, eye fatigue or headaches from reading. The user must be able to hear with or without hearing aids. Questions? Ask your eye doctor or call Eve at the number below.

*****Please note OrCam does not improve eyesight or help see better.***

Try it. Free!

March 9-11th 10-4
