

**Helen Keller Deaf-Blind Awareness Week: June 24 - 30, 2016**

## TSA Pre✓®

## Standard Screening

### Travelers eligible for TSA Pre✓®:

- Proceed to the TSA Pre✓® line;
- Present your boarding pass and government-issued ID to the TSA travel document checker;
- The TSA travel document checker will scan your boarding pass barcode.

### At the beginning of screening:

- Passengers may use TSA’s notification card to communicate discreetly with TSA officers. However, showing this card, or other medical documentation, will not exempt a passenger from screening.
- Inform the TSA officer if you:
  - have a preferred mode of communication;
  - have assistive devices that need to be screened;
  - have difficulty walking or standing alone and need assistance;
  - have difficulty raising your arms;
  - have medically-necessary liquids or other medications that need to be screened. These should be separated from other

### Travelers not eligible for TSA Pre✓®:

- Proceed to the standard screening line;
- Present your boarding pass and government-issued ID to the TSA travel document checker;
- The TSA travel document checker will scan your boarding pass barcode.

### At the beginning of screening:

- Passengers may use TSA’s disability notification card to communicate discreetly with TSA officers. However, showing this card, or other medical documentation, will not exempt a passenger from screening.
- Inform the TSA officer if you:
  - have a preferred mode of communication;
  - have assistive devices that need to be screened;
  - have difficulty walking or standing alone and need assistance;
  - have difficulty raising your arms;
  - have medically-necessary liquids or other medications

### WHAT TO KNOW

- **TSA Cares:**
  - TSA Cares is a toll-free helpline (1-855-787-2227), available for passengers with disabilities and medical conditions to get the latest information on screening. You may call from 8 a.m. to 11 p.m. ET Monday through Friday, and 9 a.m. to 8 p.m. weekends and holidays. Passengers who are deaf or hard of hearing may use Federal Relay 711.
  - Communicate information about your specific needs to TSA Cares at least 72 hours in advance of airport arrival to allow TSA to prepare for individual requirements at the airports you visit.
  - Learn more about screening procedures for travelers with disabilities and medical conditions at [TSA.gov](http://TSA.gov).
- **Passenger Support Specialists:**
  - Travelers may request the assistance of a passenger support specialist through TSA Cares, or at the airport.
  - The specialist is a specially trained staff member who provides travelers with disabilities and medical conditions on-the-spot assistance at security checkpoints.
  - Learn more about passenger support specialists at [TSA.gov](http://TSA.gov).

## **Helen Keller Deaf-Blind Awareness Week: June 24 - 30, 2016**

- **Planning Your Trip:**

- Arrive early to allow time to screen medically-necessary liquids and medical devices.
- Communicate your specific needs to the TSA officer before screening begins to facilitate your airport screening experience. This can include information about medically-necessary liquids equipment and devices as well as the location of sensitive areas. You may provide this information to the TSA officer verbally, or present a TSA notification card to the TSA officer. The notification card is a basic, non-verbal way for you to communicate your disability or medical condition to officers. However, the notification card does not exempt travelers from screening.
- The 3-1-1 liquids rule for carry-ons allows each traveler to have liquids, gels, aerosols, creams and pastes in quantities of 3.4 ounces (100ml) or less per container; in 1 quart sized, clear, plastic, zip-top bag; and 1 bag. This rule does not apply to medically-necessary liquids for travelers with disabilities and medical conditions. However, you will need to declare medically-necessary liquids for inspection at the standard and TSA Pre✓® checkpoint, and officers may need to conduct additional screening of these items.

- **Advanced Imaging Technology:**

- Travelers are eligible to be screened using advanced imaging technology if they are able to stand and walk through the machine; stand and hold their hands about their head for five to seven seconds without support; and if there is an alarm, stand for additional time to resolve the alarm.
- Travelers not wishing to be screened by advanced imaging technology, and travelers who are not eligible for such screening, can request a pat-down.
- Learn more about advanced imaging technology at [TSA.gov](http://TSA.gov).

## **Helen Keller Deaf-Blind Awareness Week: June 24 - 30, 2016**

- **Walk-Through Metal Detectors:**

- Travelers may be screened by walk through metal detectors if they can walk through the machine on their own.
- Travelers cannot request metal detector screening in lieu of advanced imaging technology or a pat-down.
- Learn more about walk through metal detectors at [TSA.gov](http://TSA.gov).

- **Pat-Downs:**

- When conducted, the pat-down will be performed by a TSA officer of the same gender.
- A traveler can request a private screening, and be accompanied by a companion of his or her choosing.
- Additionally, the traveler can request a chair if he or she needs to sit down.
- Travelers should not be asked to remove or lift any article of clothing to reveal a sensitive body area.
- Learn more about pat-downs at [TSA.gov](http://TSA.gov).

### **Explosive Trace Detection Screening:**

- TSA officers may swab personal property, or a traveler's hands, and then use explosive trace detection technology to test for explosives.
- The swab is placed inside the unit, which analyzes the content for the presence of potential explosive residue.
- Travelers can request a new swab prior to their hands being sampled.

## Helen Keller Deaf-Blind Awareness Week: June 24 - 30, 2016

- Learn more about explosive trace detection at [TSA.gov](http://TSA.gov).
- **75 Years Old and Over:**
  - Travelers 75 years old and over can leave their shoes and light jackets on while going through security checkpoints, even in the standard screening lanes.
  - Learn more about procedures for travelers 75 years old and older at [TSA.gov](http://TSA.gov).
- **12 Years Old and Under:**
  - Travelers who appear 12 years old or younger can leave their light outer jackets, garments and shoes on while going through security checkpoints, even in the standard screening lanes.
  - Learn more about traveling with children through the checkpoint at [TSA.gov](http://TSA.gov).

### WHAT TO REMEMBER:

- **Packing:** Separate medically-necessary liquids and equipment from other belongings so they can be quickly identified and accessed for screening.
- **Known Traveler Number (KTN):** Enter your known traveler number when you book your flight to get TSA Pre✓™ benefits.

## Helen Keller Deaf-Blind Awareness Week: June 24 - 30, 2016

- **Companion:** You can be accompanied by a companion of your choosing to provide assistance during the screening process. However, the companion must be re-screened after providing assistance that involves physical contact.
- **Body Piercing:** Certain metal body piercings may cause the machines to alarm, which will result in additional screening. If additional screening is required, passengers may be asked to remove their body piercing.
- **Gift Wrapping:** If a security officer needs to inspect a package, a gift may have to be unwrapped. Passengers should refrain from wrapping gifts until arriving at their final destination.
- **Dress Smart:** Dressing smart for security will get you through the checkpoint faster. Learn more about dressing smart at [TSA.gov](http://TSA.gov).

Visit [TSA.gov](http://TSA.gov) to learn more about policies for travelers with disabilities and medical conditions.
