

Building Brighter Futures
for People with Vision Loss

EXPLORE, EXPERIMENT, EXCEL!

Upcoming Event for Students who are Visually Impaired

July 25 from 10AM TO 2PM
At CABVI: 2045 Gilbert Ave, Cincinnati

Join the National Federation of the Blind for a transformative day of discovery designed for blind youth.

This year, we're diving into the exciting world of the scientific method! Participate in hands-on, accessible experiments where you'll use observation, prediction, and testing to tackle real-world problems. Exciting experiments exploring physics, technology, chemistry, and engineering await!

This opportunity offers your child:

**Blind Role
Models**

**Accessible
Experiments**

**Hands-on Nonvisual
Skills Instruction**

This program is free to all registered blind and low-vision youth (K-12). Learn more and apply at nfb.org/stem2u

Plus: Parent's Club from 10AM to 12PM!
While students are busy exploring STEM, parents are invited to relax in our Parent's Club gathering. Meet other parents of children who are visually impaired, learn about valuable resources, and connect with leaders from the National Federation of the Blind.

**Please reach out to Emily Kiehl with questions:
513-975-1353 or emily.kiehl@cincyblind.org**

Thanks to a generous donation from General Motors (GM), blind students across the country will gain foundational nonvisual tools and techniques to pursue further education and careers in STEM.
